Image naming & sizing suggestions

- **Hero / large**: 1200×800 (Home, Welcome) — use high-quality JPG or WebP.
- **Tile / card**: 800×600 or 600×400 — used for tiles and admin/customer small image-buttons.
- **Thumb**: 300×200 or 400×300 — used in menu list thumbnails.
- Keep aspect ratio consistent per type. Prefer WebP/JPEG for photos; PNG for icons with transparency.
- Add descriptive `alt` text for accessibility (see examples above).

Usage notes

- Replace tokens (e.g. `BREAKFAST_IMG_1`) in the HTML/JS with full image URLs or relative paths.
- For quick testing you can use placeholder services (e.g. `https://picsum.photos/800/600?random=1`) and then swap with real assets later.
- If you want, I can generate a CSV or a ZIP manifest mapping placeholders → suggested filenames.

End of list.
